Vehicle Performance Analyzer empathy map

SAYS
- What are the operation done in this operation?
- what's new in this?
- How this model used in the new generation

- Predict the vehicle performance
- Its about the vehicle performance based on the given parameters

THINKS
- The more numbers of usage of models the higher in accuracy
- Best vehicle is predicted using user input

- Expecting to give highest standards of all
- Increasing demands and expectations in smart vehicles

DOES
- For spots cars need powerful motor to provide high performance
- whereas regular cars have moderately power engines that easily handle performance

FEELS
- Asking proposal on model
- Performance review
- Excited
- Productive and may not be accurate
